

Welcome ...

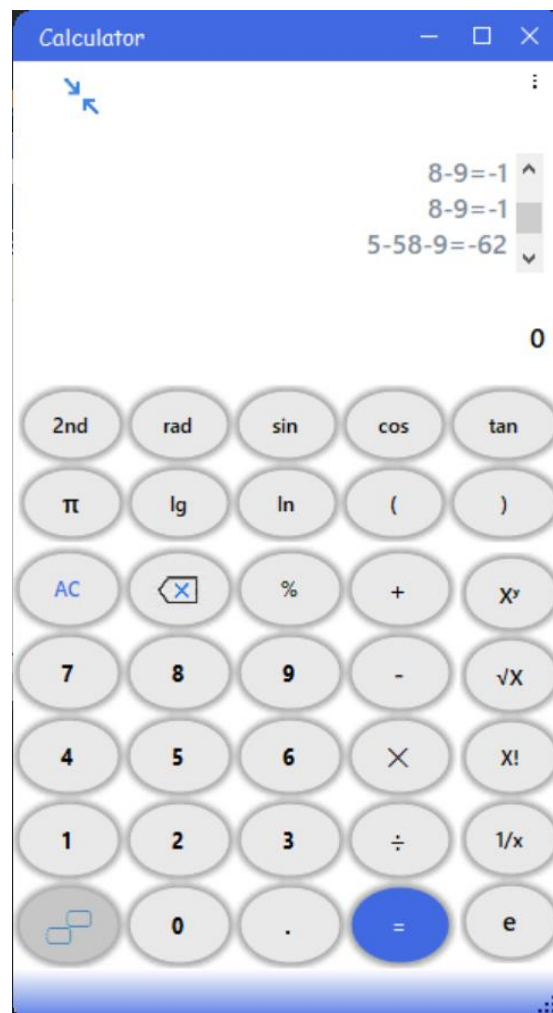

Using Calculator

You can use Calculator to perform simple calculations such as addition, subtraction, multiplication, and division. Calculator also offers the advanced capabilities of a scientific calculator.

You can perform calculations by clicking the calculator buttons, or you can type calculations by using your keyboard. You can also use the numeric keypad to type numbers and operators by pressing Num Lock.

Using Scientific Mode

1. Click Button with this icon:

2. Click the calculator keys to perform the calculation you want.

- To access inverse function, click button labeled as 2nd.
- To access Degree mode or Radian mode click on toggle button labeled as rad or deg.

Using Popup Calculator

1. Click Button with this icon:

2. To change the transparency of popup window moves the track bar provided at bottom.

Using History

Calculation history keeps track of all the calculations that Calculator performs in a session and is available in Standard and Scientific modes. As well as it keeps track of last 5 calculations even after a session you can see this history even after you close the application.

1. Click the three-dot icon given at top-right corner
2. Click on history:

3. Here you can review your history.
